

# FOREIGN AFFAIRS SECURITY TRAINING CENTER [FASTC]

An American Recovery and Reinvestment Act of 2009 Project

## TRAFFIC/TRANSPORTATION - STUDY INTERSECTIONS

### What is a Traffic Impact Study?

- Specialized study that evaluates existing traffic conditions and future traffic conditions with and without the training center.
- Recommendations for offsetting the training center's traffic impacts.
- Balance traffic movements and land access.

## TRAFFIC/TRANSPORTATION - EVALUATION

---

### What will the traffic impact study evaluate?

- 2010 (Existing)
- 2011 (Phase 1)
  - Without the training center
  - With the training center
- 2014 (Build out)
  - Without the training center
  - With the training center

### Potential trip generation mitigation:

- Shuttle buses for local DC area students
- Shuttle buses for non-local students staying in area hotels
- Commuter buses for employees
- Carpool and Vanpool programs

## TRAFFIC/TRANSPORTATION - EVALUATION FACTORS

---

### What factors would also be considered in the traffic impact study?

- Accidents
- Roadway geometry/traffic control
- Trucks
- Seasonal variation
- U.S. 301/MD 304 grade-separated interchange
- U.S. 301/MD 304 interim improvements
- Pipeline project traffic
- Regional traffic growth
- Planned improvements
- Interim improvements to off-set the training center's impacts
- Ultimate improvements to off-set the training center's impacts
- Transportation programs to reduce peak hour site trips
